2011-2012 Baler Inspection Special

Have your equipment in working condition and be ready for 2012!

Take advantage of the Knowles Produce Baler Inspection Special

Here's how it works:

- √ Let our Service Technician come out to your farm
- √ He'll perform a 74 point inspection on your baler
- √ He'll check for common trouble areas that may keep you out of the field

So, before you put your baler away for the winter, let us check it out for you first!
We can diagnose, service, and prepare your baler so it's ready to go for 2012

If repairs are needed on your baler, we can run the parts and repairs on our
Winter Service Special Program

Knowles Produce Baler Inspection Special is \$100.00/inspection within 25 miles of Knowles
Or a small additional fee if further away.

We'll give you an estimate for repairs & free hauling if you have us fix the trouble areas for
you

Call Skip or Tom with any questions or to schedule an inspection
